

MT8002 Elements of Set Theory

Appendix: Mathematical Notation and Acronyms

Andrés Sicard-Ramírez

Universidad EAFIT

Semester 2026-2

Preliminaries

Textbook

Derek Goldrei (1996). Classic Set Theory. A Guided Independent Study.

Mathematical Notation and Acronyms

Numerical sets

$\mathbb{N}$: Set of natural numbers (including the zero)

$\mathbb{Z}$: Set of all integers (positive, negative and zero)

$\mathbb{R}$: Set of real numbers

Acronyms

FOL (First-Order Logic)

FOLEQ (First-Order Logic with Equality)

ZFC (Zermelo–Fraenkel Set Theory with Choice)
